PROFESSIONAL SUMMARY

Information Technology graduate specializing in Cybersecurity, with IT enterprise support experience involving Windows administration, Active Directory, and network troubleshooting. Hands-on academic laboratory experience using Kali Linux, Nmap, Wireshark, and Metasploit for network scanning, packet analysis, and security testing exercises. Seeking an entry-level SOC Analyst or Cybersecurity Analyst role.

TECHNICAL SKILLS

Security tools: Nmap, Wireshark, Metasploit, Kali Linux

Security knowledge: Network security, vulnerability assessment fundamentals, incident response fundamentals, IAM, SIEM concepts

Operating systems: Windows, Kali Linux

Networking: TCP/IP, DNS, DHCP, VLANs, routing, network troubleshooting

System administration: Active Directory, user/group management, Linux file permissions, Windows deployment

Programming: Python, SQL, C#, C++, Java

PROFESSIONAL EXPERIENCE

IT Technical Support Intern | Datamatics Global Services | May–July 2026

- Diagnosed and troubleshot Windows workstations, network connectivity, printers, and enterprise software issues.
- Assisted with Active Directory user administration, password resets, and account-related support requests.
- Installed and configured Windows operating systems, enterprise applications, and workstation hardware.
- Supported workstation deployment, system imaging, and hardware replacement activities.
- Documented technical incidents and collaborated with senior IT personnel to resolve issues.

CYBERSECURITY LABORATORY EXPERIENCE

Network Analysis and Security Testing | Academic Laboratory

- Used Nmap for network scanning and host/service discovery exercises in laboratory environments.
- Used Wireshark to capture and inspect network packets for traffic analysis.
- Practiced penetration testing concepts with Metasploit in controlled laboratory exercises.
- Used Kali Linux terminal commands for navigation and security laboratory activities.

TECHNICAL PROJECT

HOPFOG | Decentralized Offline Messaging System (2026)

- Developed a multi-hop offline messaging system using ESP32, XBee, FastAPI, and REST APIs; implemented priority messaging and TTL-based storage, with 100% message delivery in tests involving 7–10 concurrent users.

EDUCATION

Mapúa Malayan Colleges Laguna | Bachelor of Science in Information Technology, Specialization in Cybersecurity

CERTIFICATIONS & TRAINING

Google Cybersecurity Professional Certificate | Cisco Ethical Hacker | Cisco CCNA: Switching, Routing, and Wireless Essentials | CompTIA Tech+ | Google Cloud Foundations

PROFESSIONAL AFFILIATION

Cybersecurity Society of the Philippines, Inc. | Member
